## PERFORMANCE FABRIC CARE

### **Indoors**

Fabric is meant for indoors.

### **UV & Fade Resistant**

Fabric can be used outdoors. Fabric has properties that enhance the time the color stays true by delaying the fading of color from UV rays.

### **Cleanability**

Some fabrics can be cleaned with agents like diluted bleach while others should only be cleaned with soap and water.

### **Anti-Mildew**

Fabric has properties which prevent the development of mildew

### **Anti-Moisture**

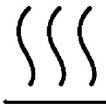

Prevents liquids from penetrating or damaging the fabrics. Liquids may sit on the surface or pass thru without soaking into the yarns & fibers making up the fabric.

### **Odor Resistant**

Designed and treated to create a breathable moisture barrier that prevents bacterial and odor build-up

### **Stain Resistant**

Resists typical household stains or marks by preventing them from penetrating the fabric permanently.

\* All other fabrics tagged as Stain Resistant are for indoor use only.
